

Molecular Conceptor 2 - Quick Installation Card

To install:

1. Close all Windows applications.
2. Insert the *Molecular Conceptor* DVD in your DVD -ROM drive. If the "Molecular Conceptor Installation Setup" doesn't automatically run, double-click the 'mc2_setup.exe' program in the root directory of the DVD.
3. Follow the installation instructions
4. The Installation program will also install the HASP driver. You might be asked to reboot the computer.
5. After the completion of the installation program, insert your black/violet HASP key into your computer USB port.
6. Run *Molecular Conceptor* via the **Start** menu:
Start Menu | Programs | Molecular Conceptor 2 | Molecular Conceptor
